Welcome To
National Institute of Technology

We have designed and developed our education and training programs to prepare you for the future - to become successful in your career & life.

The National Institute of Technology is a progressive and highly regarded education and training organisation specialising in Information Technology, Engineering, Project Management and Business Management. Our focus is to help you develop the skills and knowledge you need to get a job, advance your career or in your pathway to further studies at university or higher education providers.

With a strong focus on future-proof education, we equip you with the knowledge, skills, and adaptability you need to thrive in the challenges of tomorrow. We have many initiatives to support our students, such as the Industry Internships Program and the Help You Prepare for Employment (HYPE) Program.

Stay ahead of the curve with our training

Discover the NIT Difference

Work-Ready Program

You can develop your work-ready job skills by joining the HYPE program. This is a free program available to NIT students to understand the job market, get ready for interviews, and enhance your ability to thrive in the workplace.

Internship Programs

Our Internship program provides you with an opportunity to work hands-on in a real-life professional environment. You will gain work experience while studying and start to build your professional networks.

Personalised Student Support

Our dedicated team prides itself on knowing every student's name and being able to provide individual, tailored support in all areas of your studies, including academic, Language Literacy and Numeracy and general welfare, to help you to succeed.

Industry Affiliations & Partnerships

NIT has established partnerships with leading industry organisations to provide access to the latest technologies and learning resources, so you enter the workforce with up-to-date knowledge and skills.

Learn from Industry Professional

Be taught by trainers who are professionals in their field and ready to inspire the next generation. They all have extensive work experience in their discipline area and are qualified to help you achieve your goals.

University & Tertiary Study Pathways

You can transfer seamlessly with up to 1-year of credit into an undergraduate degree after completing our Diploma into selected Universities and Higher Education Institutions.

Work-Ready & Internships
Programs

We have designed these programs to help our students understand and practice the skills required in gaining a professional employment.

HYPE Program

Help Your Prepare for Employment (HYPE) is a program designed to equip our students with essential skills for the workplace and boost their employability. The program emphasises career planning, job search, professional workplace culture and effective communication, creating effective resumes and LinkedIn profiles, and preparing for job interviews. It is a free program available to all students enrolled in a VET course at NIT. Check our website for more details.

Internships Program

Our Internships Program is designed to ensure that you gain meaningful work experience and skills that align with your career goals. After meeting the internship eligibility requirements, our experienced internship placement team works closely with you and the host organisations to make sure you are placed in a suitable internship. We boast a remarkable 100% success rate in placing our interns. Internship Program incurs an additional fee. Check our website for more details.

200+ Employer Organisations

NIT has established linkages with over 200 organisations varying in size and industry sectors that host our interns, allowing you to establish valuable contacts and references for future employment.

Some of our host organisations include:

Higher Education Pathway Providers

Nikola Kirsty Parsons

"I was studying at a different college which I didn't enjoy and I was scared I may have the same experience at NIT, but it was the opposite when I came here which I am happy about. I never thought I would understand programming but gradually I am gaining more knowledge in this field better than I ever thought I would. The trainers work very hard to ensure students get the help we need and I feel like we are a part of a family here."

Lesley Lo

"The course structure combined both practical and theoretical parts so that we need to demonstrate what we learned in real configuration. I like the design of most skill assignments as it simulates different business scenarios, we can practice how to play well in our roles no matter if our title is help desk officer or network administrator. My time at NIT was very rewarding to me."

Harry Hall

"I have learned a great overview of many aspects of how a business works and I enjoy the mix of formal and informal learning styles. I have also made a lot of new friends from different cultures. I recommend studying at NIT to improve yourself and learn new things with a quality provider."
